Examples
What do you want to do?
Predict values
Predict sales figures
Predict stock prices
Linear Regression
Boosted Trees Regressor
AutoML Table Regressor
DNN Regressor
Wide & Deep Regressor
Predict between categories
Identify spam emails
Identify tumor types
Logistic Regression
Boosted Trees Classifier
AutoML Table Classifer
DNN Classifier
Wide & Deep Classifier
Generate Recommendations
Product recommendation
Create personalized content
Matrix Factorization
Reduce Data Dimenstionality
Analysis of written text
Analysis of DNA data
PCA
Find Anomalies
Detect fraud
Predict credit risk
Autoencoder
Group data into clusters
Perform customer segmentation
K-Means
Time Series Forecasting
Predict housing prices based on historical data
ARIMA-PLUS
