<http://apigee.com/docs/api-services/reference/supported-software>
-

Deployment options (Apigee Edge for Private Cloud only)

- May be deployed on hardware (virtual or physical) with any number of cores
 - Deployable in single or multi-data center, active/active or active/standby configurations
 - Requires supported OS and other packages as described in pre-requisite check and/or documentation
-

Limitations

- Additional payment gateways integration available via custom work, additional charges may apply.
- Payment gateway set up fees and transaction fees apply separately and are not part of Apigee subscription license.
- Limit enforcement may be near real time.
- Currency exchange calculation and tax calculation engine needs to be licensed and installed by customer. Configuration of these engines might require custom work, additional charges may apply.

- Posting files to other systems in specific format possible via custom work, additional charges may apply.
- Customer needs to license and install iText as a prerequisite for converting billing documents into PDF formats
