Please note that Version 1.0 of the Data Processing and Security Terms for Apigee Products will apply until 24 May 2018 (inclusive) and, as from 25 May 2018 (when the EU’s General Data Protection Regulation comes into force), will be replaced by Version 2.0 of the Data Processing and Security Terms for Apigee Products. Both versions are below. By accepting these terms, you agree to both versions.

---

### Data Processing and Security Terms for Apigee Products (v1.0)

---

### Data Processing and Security Terms for Apigee Products (v2.0)

The customer agreeing to these terms (“Customer”), and Google LLC (formerly known as Google Inc.), Google Ireland Limited, Google Asia Pacific Pte. Ltd., Google Australia Pty Ltd. or any other entity that directly or indirectly controls, is controlled by, or is under common control with Google LLC (as applicable, “Google”), have entered into an agreement under which Google has agreed to provide Cloud Services to Customer (as amended from time to time, the "Agreement").

These Data Processing and Security Terms for Apigee Products, including their appendices (the “Terms”) will be effective and replace any previously applicable data processing and security terms as from the Terms Effective Date (as defined below).

These Terms supplement the Agreement. Where the Agreement was entered into offline, these Terms supersede any clauses governing the processing, security or privacy of Customer Data in the Agreement.

### 1. Introduction

These Terms reflect the parties’ agreement with respect to the terms governing the processing and security of Customer Data under the Agreement.

### 2. Definitions

2.1 Capitalized terms used but not defined in these Terms have the meanings set out in the Agreement. In these Terms, unless stated otherwise:

**Additional Security Controls** means security resources, features, functionality and/or controls that Customer may use at its option and/or as it determines, including the Admin Console and other features and/or functionality of the Cloud Services such as encrypted key value maps, logging and monitoring, identity and access management, data masking, and rate limiting.

**Admin Console** means the online console(s) and/or tool(s) provided by Google to Customer for administering the Cloud Services.
**Agreed Liability Cap** means the maximum monetary or payment-based amount at which a party’s liability is capped under the Agreement, either per annual period or event giving rise to liability, as applicable.

**Affiliate** has the meaning defined in the Agreement, and if not defined therein means any entity that directly or indirectly controls, is controlled by, or is under common control with a party, where “control” means control of greater than fifty percent of the voting rights or equity interests of a party.

**Alternative Transfer Solution** means a solution, other than the Model Contract Clauses, that enables the lawful transfer of personal data to a third country in accordance with Article 45 or 46 of the GDPR (for example, the EU-U.S. Privacy Shield).

**Audited Services** means the Cloud Services, excluding any Cloud Services that are being discontinued in accordance with the Deprecation Policy for Apigee Products.

**Cloud Services** means the Edge Cloud service offerings as further described at [http://apigee.com/about/specification-sheets](http://apigee.com/about/specification-sheets).

**Customer Data** means data provided by or on behalf of Customer or Customer’s end users via the Cloud Services under Customer’s Google account.

**Customer Personal Data** means the personal data contained within the Customer Data.

**Data Incident** means a breach of Google’s security leading to the accidental or unlawful destruction, loss, alteration, unauthorized disclosure of, or access to, Customer Personal Data on systems managed by or otherwise controlled by Google. “Data Incidents” will not include unsuccessful attempts or activities that do not compromise the security of Customer Personal Data, including unsuccessful log-in attempts, pings, port scans, denial of service attacks, and other network attacks on firewalls or networked systems.

**Deprecation Policy for Apigee Products** means the deprecation policy for Apigee Products identified at [https://docs.apigee.com/deprecation](https://docs.apigee.com/deprecation).

**EEA** means the European Economic Area.

**European Data Protection Legislation** means, as applicable: (a) the GDPR; and/or (b) the Federal Data Protection Act of 19 June 1992 (Switzerland).

**GDPR** means Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC.

**Google’s Third Party Auditor** means a Google-appointed, qualified and independent third party auditor, whose then-current identity Google will disclose to Customer.

**Infrastructure Provider** has the meaning given in Section 5.3 (Infrastructure Providers).

**Model Contract Clauses** or **MCCs** mean the standard data protection clauses for the transfer of personal data to processors established in third countries which do not ensure an adequate level of data protection, as described in Article 46 of the GDPR.
Non-European Data Protection Legislation means data protection or privacy legislation other than the European Data Protection Legislation.

Notification Email Address means the email address(es) designated by Customer in the Admin Console, technical support portal, or in the Order Form or ordering document (as applicable), to receive certain notifications from Google.

Security Documentation means all documents and information made available by Google under Section 7.5.1 (Reviews of Security Documentation).

Security Measures has the meaning given in Section 7.1.1 (Google’s Security Measures).

SOC 2 Report means a confidential Service Organization Control (SOC) 2 report (or a comparable report) on Google’s systems examining logical security controls, physical security controls, and system availability, as produced by Google’s Third Party Auditor in relation to the Audited Services.

Subprocessors means third parties authorized under these Terms to have logical access to and process Customer Data in order to provide parts of the Cloud Services.

Term means the period from the Terms Effective Date until the end of Google’s provision of the Cloud Services, including, if applicable, any period during which provision of the Cloud Services may be suspended and any post-termination period during which Google may continue providing the Cloud Services for transitional purposes.

Terms Effective Date means, as applicable:

(a) 25 May 2018, if Customer clicked to accept or the parties otherwise agreed to these Terms prior to or on such date; or

(b) the date on which Customer clicked to accept or the parties otherwise agreed to these Terms, if such date is after 25 May 2018.

2.2 The terms “personal data”, “data subject”, “processing”, “controller”, “processor” and “supervisory authority” as used in these Terms have the meanings given in the GDPR, and the terms “data importer” and “data exporter” have the meanings given in the Model Contract Clauses, in each case irrespective of whether the European Data Protection Legislation or Non-European Data Protection Legislation applies.

3. Duration and Modification of these Terms

These Terms will take effect on the Terms Effective Date and, notwithstanding expiry of the Term, will remain in effect until, and automatically expire upon, deletion of all Customer Data by Google as described in these Terms. Google may only change these Terms where such change is required to comply with applicable law, applicable regulation, court order, or guidance issued by a governmental regulator or agency, where such change is expressly permitted by these Terms, or where such change:

(a) is commercially reasonable;

(b) does not result in a degradation of the overall security of the Services;
(c) does not expand the scope of or remove any restrictions on Google’s processing of Customer Personal Data, as described in Section 5.2 (Scope of Processing) of these Terms; and

(d) does not otherwise have a material adverse impact on Customer’s rights under these Terms.

If Google makes a material change to these Terms in accordance with this Section, Google will post the modification to the URL containing these terms. Notwithstanding anything to the contrary in the Agreement, a change to these Terms under this Section will not require a written document signed by Customer and Google. From time to time, Google may change any URL referenced in these Terms and the content at any such URL.

4. Scope of Data Protection Legislation

4.1 Application of European Legislation. The parties acknowledge and agree that the European Data Protection Legislation will apply to the processing of Customer Personal Data if, for example:

(a) the processing is carried out in the context of the activities of an establishment of Customer in the territory of the EEA; and/or
(b) the Customer Personal Data is personal data relating to data subjects who are in the EEA and the processing relates to the offering to them of goods or services in the EEA or the monitoring of their behaviour in the EEA.

4.2 Application of Non-European Legislation. The parties acknowledge and agree that Non-European Data Protection Legislation may also apply to the processing of Customer Personal Data.

4.3 Application of Terms. Except to the extent these Terms state otherwise, these Terms will apply irrespective of whether the European Data Protection Legislation or Non-European Data Protection Legislation applies to the processing of Customer Personal Data.

5. Processing of Data

5.1 Roles and Regulatory Compliance; Authorization.

5.1.1 Processor and Controller Responsibilities. If the European Data Protection Legislation applies to the processing of Customer Personal Data, the parties acknowledge and agree that:

(a) the subject matter and details of the processing are described in Appendix 1;
(b) Google is a processor of that Customer Personal Data under the European Data Protection Legislation;
(c) Customer is a controller or processor, as applicable, of that Customer Personal Data under European Data Protection Legislation; and
(d) each party will comply with the obligations applicable to it under the European Data Protection Legislation with respect to the processing of that Customer Personal Data.

5.1.2 Authorization by Third Party Controller. If the European Data Protection Legislation applies to the processing of Customer Personal Data and Customer is a processor, Customer warrants to Google that Customer’s instructions and actions with respect to that Customer Personal Data,
including its appointment of Google as another processor, have been authorized by the relevant controller.

5.1.3 **Responsibilities under Non-European Legislation.** If Non-European Data Protection Legislation applies to either party’s processing of Customer Personal Data, the parties acknowledge and agree that the relevant party will comply with any obligations applicable to it under that legislation with respect to the processing of that Customer Personal Data.

5.2 **Scope of Processing.**

5.2.1 **Customer’s Instructions.** By entering into these Terms, Customer instructs Google to process Customer Personal Data only in accordance with applicable law: (a) to provide the Cloud Services; (b) as further specified via Customer’s use of the Cloud Services (including the Admin Console and other functionality of the Cloud Services); (c) as documented in the form of the Agreement, including these Terms; and (d) as further documented in any other written instructions given by Customer and acknowledged by Google as constituting instructions for purposes of these Terms.

5.2.2 **Google’s Compliance with Instructions.** Google will comply with the instructions described in Section 5.2.1 (Customer’s Instructions) (including with regard to data transfers) unless EU or EU Member State law to which Google is subject requires other processing of Customer Personal Data by Google, in which case Google will inform Customer (unless that law prohibits Google from doing so on important grounds of public interest) via the Notification Email Address.

5.3 **Infrastructure Providers.** Customer authorizes Amazon Web Services, Inc., Acquia Inc., and Pantheon Systems, Inc. (each, an “Infrastructure Provider”), through Apigee Corporation, a Google Affiliate Subprocessor, to provide underlying infrastructure services in the provision of the Cloud Services.

6. **Data Deletion**

6.1 **Deletion by Customer.** Google will enable Customer to delete Customer Data during the Term in a manner consistent with the functionality of the Cloud Services. If Customer uses the Cloud Services to delete any Customer Data during the Term and that Customer Data cannot be recovered by Customer, this use will constitute an instruction to Google to delete the relevant Customer Data from Google’s systems in accordance with applicable law. Google will comply with this instruction as soon as reasonably practicable and within a maximum period of 180 days, unless EU or EU Member State law requires storage. Only deletion of Customer’s account results in deletion of all of the associated data.

6.2 **Deletion on Termination.** On expiry of the Term, Customer instructs Google to delete all Customer Data (including existing copies) from Google’s systems in accordance with applicable law. Google will comply with this instruction as soon as reasonably practicable and within a maximum period of 180 days, unless EU or EU Member State law requires storage. Without prejudice to Section 9.1 (Access; Rectification; Restricted Processing; Portability), Customer acknowledges and agrees that Customer will be responsible for exporting, before the Term expires, any Customer Data it wishes to retain afterwards.

7. **Data Security**

7.1 **Google’s Security Measures, Controls and Assistance.**

7.1.1 **Google’s Security Measures.** Google will implement and maintain technical and organizational measures to protect Customer Data against accidental or unlawful destruction, loss, alteration, unauthorized disclosure or access as described in Appendix 2 (the “Security Measures”).
As described in Appendix 2, the Security Measures include measures to make encryption of personal data available; to help ensure ongoing confidentiality, integrity, availability and resilience of Google’s systems and services; to help restore timely access to personal data following an incident; and for regular testing of effectiveness. Google may update or modify the Security Measures from time to time provided that such updates and modifications do not result in the degradation of the overall security of the Cloud Services.

7.1.2 Security Compliance by Google Staff. Google will take appropriate steps to ensure compliance with the Security Measures by its employees, contractors and Subprocessors to the extent applicable to their scope of performance, including ensuring that all persons authorized to process Customer Personal Data have committed themselves to confidentiality or are under an appropriate statutory obligation of confidentiality.

7.1.3 Additional Security Controls. In addition to the Security Measures, Google will make the Additional Security Controls available to: (a) allow Customer to take steps to secure Customer Data; and (b) provide Customer with information about securing, accessing and using Customer Data.

7.1.4 Google’s Security Assistance. Customer agrees that Google will (taking into account the nature of the processing of Customer Personal Data and the information available to Google) assist Customer in ensuring compliance with any of Customer’s obligations in respect of security of personal data and personal data breaches, including if applicable Customer’s obligations pursuant to Articles 32 to 34 (inclusive) of the GDPR, by:

(a) implementing and maintaining the Security Measures in accordance with Section 7.1.1 (Google’s Security Measures);

(b) making the Additional Security Controls available to Customer in accordance with Section 7.1.3 (Additional Security Controls);

(c) complying with the terms of Section 7.2 (Data Incidents); and

(d) providing Customer with the Security Documentation in accordance with Section 7.5.1 (Reviews of Security Documentation) and the information contained in the Agreement including these Terms.

7.2. Data Incidents

7.2.1 Incident Notification. If Google becomes aware of a Data Incident, Google will: (a) notify Customer of the Data Incident promptly and without undue delay after becoming aware of the Data Incident; and (b) promptly take reasonable steps to minimize harm and secure Customer Personal Data.

7.2.2 Details of Data Incident. Notifications made pursuant to this section will describe, to the extent possible, details of the Data Incident, including steps taken to mitigate the potential risks and steps Google recommends Customer take to address the Data Incident.

7.2.3 Delivery of Notification. Notification(s) of any Data Incident(s) will be delivered to the Notification Email Address or, at Google’s discretion, by direct communication (for example, by phone call or an in-person meeting). Customer is solely responsible for ensuring that the Notification Email Address is current and valid.

7.2.4 No Assessment of Customer Personal Data by Google. Google will not assess the contents of Customer Personal Data in order to identify information subject to any specific legal
requirements. Customer is solely responsible for complying with incident notification laws applicable to Customer and fulfilling any third party notification obligations related to any Data Incident(s).

7.2.5 **No Acknowledgement of Fault by Google.** Google’s notification of or response to a Data Incident under this Section 7.2 (Data Incidents) will not be construed as an acknowledgement by Google of any fault or liability with respect to the Data Incident.

7.3 **Customer’s Security Responsibilities and Assessment.**

7.3.1 **Customer’s Security Responsibilities.** Customer agrees that, without prejudice to Google’s obligations under Section 7.1 (Google’s Security Measures, Controls and Assistance) and Section 7.2 (Data Incidents):

(a) Customer is solely responsible for its use of the Cloud Services, including:

   (i) making appropriate use of the Cloud Services and the Additional Security Controls to ensure a level of security appropriate to the risk in respect of the Customer Data;

   (ii) securing the account authentication credentials, systems and devices Customer uses to access the Cloud Services;

   (iii) backing up its Customer Data; and

(b) Google has no obligation to protect Customer Data that Customer elects to store or transfer outside of Google’s and its Subprocessors’ systems (for example, offline or on-premise storage), or to protect Customer Data by implementing or maintaining Additional Security Controls except to the extent Customer has opted to use them.

7.3.2 **Customer’s Security Assessment.**

(a) Customer is solely responsible for reviewing the Security Documentation and evaluating for itself whether the Cloud Services, the Security Measures, the Additional Security Controls and Google’s commitments under this Section 7 (Data Security) will meet Customer’s needs, including with respect to any security obligations of Customer under the European Data Protection Legislation and/or Non-European Data Protection Legislation, as applicable.

(b) Customer acknowledges and agrees that (taking into account the state of the art, the costs of implementation and the nature, scope, context and purposes of the processing of Customer Personal Data as well as the risks to individuals) the Security Measures implemented and maintained by Google as set out in Section 7.1.1 (Google’s Security Measures) provide a level of security appropriate to the risk in respect of the Customer Data.

7.4 **Security Certifications and Reports.** Google will update the SOC 2 Report at least once every 18 months to evaluate and help ensure the continued effectiveness of the Security Measures.

7.5 **Reviews and Audits of Compliance**

7.5.1 **Reviews of Security Documentation.** In addition to the information contained in the Agreement (including these Terms), Google will make available for review by Customer the then-current SOC 2 Report, following a request by Customer in accordance with Section 7.5.3(a), to demonstrate compliance by Google with its obligations under these Terms.
7.5.2 Customer’s Audit Rights.

(a) If the European Data Protection Legislation applies to the processing of Customer Personal Data, Google will allow Customer or an independent auditor appointed by Customer to conduct audits (including inspections) to verify Google’s compliance with its obligations under these Terms in accordance with Section 7.5.3 (Additional Business Terms for Reviews and Audits). Google will contribute to such audits as described in Section 7.4 (Security Certifications and Reports) and this Section 7.5 (Reviews and Audits of Compliance).

(b) If Customer has entered into Model Contract Clauses as described in Section 10.2 (Transfers of Data Out of the EEA), Google will, without prejudice to any audit rights of a supervisory authority under such Model Contract Clauses, allow Customer or an independent auditor appointed by Customer to conduct audits as described in the Model Contract Clauses in accordance with Section 7.5.3 (Additional Business Terms for Reviews and Audits).

(c) Customer may also conduct an audit to verify Google’s compliance with its obligations under these Terms by reviewing the Security Documentation (which reflects the outcome of audits conducted by Google’s Third Party Auditor).

7.5.3 Additional Business Terms for Reviews and Audits.

(a) Customer must send any requests for reviews of the SOC 2 Report under Section 7.5.1 or audits under Section 7.5.2(a) or 7.5.2(b) to Google’s Cloud Data Protection Team as described in Section 12 (Cloud Data Protection Team; Processing Records).

(b) Following receipt by Google of a request under Section 7.5.3(a), Google and Customer will discuss and agree in advance on: (i) the reasonable date(s) of and security and confidentiality controls applicable to any review of the SOC 2 Report under Section 7.5.1; and (ii) the reasonable start date, scope and duration of and security and confidentiality controls applicable to any audit under Section 7.5.2(a) or 7.5.2(b).

(c) Google may charge a fee (based on Google’s reasonable costs) for any review of the SOC 2 Report under Section 7.5.1 and/or audit under Section 7.5.2(a) or 7.5.2(b). Google will provide Customer with further details of any applicable fee, and the basis of its calculation, in advance of any such review or audit. Customer will be responsible for any fees charged by any auditor appointed by Customer to execute any such audit.

(d) Google may object in writing to an auditor appointed by Customer to conduct any audit under Section 7.5.2(a) or 7.5.2(b) if the auditor is, in Google’s reasonable opinion, not suitably qualified or independent, a competitor of Google, or otherwise manifestly unsuitable. Any such objection by Google will require Customer to appoint another auditor or conduct the audit itself.

7.5.4 No Modification of MCCs. Nothing in this Section 7.5 (Reviews and Audits of Compliance) varies or modifies any rights or obligations of Customer or Google LLC under any Model Contract Clauses entered into as described in Section 10.2 (Transfers of Data Out of the EEA).

8. Impact Assessments and Consultations.

Customer agrees that Google will (taking into account the nature of the processing and the information available to Google) assist Customer in ensuring compliance with any obligations of Customer in respect of data protection impact assessments and prior consultation, including if applicable Customer’s obligations pursuant to Articles 35 and 36 of the GDPR, by:
9. Data Subject Rights; Data Export

9.1 Access; Rectification; Restricted Processing; Portability. During the Term, Google will, in a manner consistent with the functionality of the Cloud Services, enable Customer to access, rectify and restrict processing of Customer Data, including via the deletion functionality provided by Google as described in Section 6.1 (Deletion by Customer), and to export Customer Data.

9.2 Data Subject Requests

9.2.1 Customer’s Responsibility for Requests. During the Term, if Google receives any request from a data subject in relation to Customer Personal Data, Google will advise the data subject to submit their request to Customer and Customer will be responsible for responding to any such request including, where necessary, by using the functionality of the Cloud Services.

9.2.2 Google’s Data Subject Request Assistance. Customer agrees that Google will (taking into account the nature of the processing of Customer Personal Data) assist Customer in fulfilling any obligation to respond to requests by data subjects, including if applicable Customer’s obligation to respond to requests for exercising the data subject’s rights laid down in Chapter III of the GDPR, by:

(a) providing the Additional Security Controls in accordance with Section 7.1.3 (Additional Security Controls); and

(b) complying with the commitments set out in Section 9.1 (Access; Rectification; Restricted Processing; Portability) and Section 9.2.1 (Customer’s Responsibility for Requests).

10. Data Transfers

10.1 Data Storage and Processing Facilities. Google may, subject to Section 10.2 (Transfers of Data Out of the EEA), store and process Customer Data anywhere Google or its Subprocessors maintains facilities.

10.2 Transfers of Data Out of the EEA

10.2.1 Google’s Transfer Obligations. If the storage and/or processing of Customer Personal Data (as set out in Section 10.1 (Data Storage and Processing Facilities)) involves transfers of Customer Personal Data out of the EEA, and the European Data Protection Legislation applies to the transfers of such data ("Transferred Personal Data"), Google will:

(a) if requested to do so by Customer, ensure that Google LLC as the data importer of the Transferred Personal Data enters into Model Contract Clauses with Customer as the data exporter of such data, and that the transfers are made in accordance with such Model Contract Clauses; and/or

(b) offer an Alternative Transfer Solution, ensure that the transfers are made in accordance with such Alternative Transfer Solution, and make information available to Customer about such Alternative Transfer Solution.
10.2.2 **Customer’s Transfer Obligations.** In respect of Transferred Personal Data, Customer agrees that:

(a) if under the European Data Protection Legislation Google reasonably requires Customer to enter into Model Contract Clauses in respect of such transfers, Customer will do so; and

(b) if under the European Data Protection Legislation Google reasonably requires Customer to use an Alternative Transfer Solution offered by Google, and reasonably requests that Customer take any action (which may include execution of documents) strictly required to give full effect to such solution, Customer will do so.

10.3 **Google Data Center Information.** Information about the locations of Google data centers is available at: [https://www.google.com/about/datacenters/inside/locations/index.html](https://www.google.com/about/datacenters/inside/locations/index.html) (as may be updated by Google from time to time).

10.4 **Disclosure of Confidential Information Containing Personal Data.** If Customer has entered into Model Contract Clauses as described in Section 10.2 (Transfers of Data Out of the EEA), Google will, notwithstanding any term to the contrary in the Agreement, ensure that any disclosure of Customer’s Confidential Information containing personal data, and any notifications relating to any such disclosures, will be made in accordance with such Model Contract Clauses.

11. **Subprocessors**

11.1 **Consent to Subprocessor Engagement.** Customer specifically authorizes the engagement of Google’s Affiliates as Subprocessors. In addition, Customer generally authorizes the engagement of any other third parties as Subprocessors (“Third Party Subprocessors”). If Customer has entered into Model Contract Clauses as described in Section 10.2 (Transfers of Data Out of the EEA), the above authorizations will constitute Customer’s prior written consent to the subcontracting by Google LLC of the processing of Customer Data if such consent is required under the Model Contract Clauses.

11.2 **Information about Subprocessors.** Information about Google’s Subprocessors, including their functions and locations, is available at: [https://cloud.google.com/terms/third-party-suppliers](https://cloud.google.com/terms/third-party-suppliers) (as may be updated by Google from time to time in accordance with these Terms).

11.3 **Requirements for Subprocessor Engagement.** When engaging any Subprocessor, Google will:

(a) ensure via a written contract that:

(i) the Subprocessor only accesses and uses Customer Data to the extent required to perform the obligations subcontracted to it, and does so in accordance with the Agreement (including these Terms) and any Model Contract Clauses entered into or Alternative Transfer Solution adopted by Google as described in Section 10.2 (Transfers of Data Out of the EEA); and

(ii) if the GDPR applies to the processing of Customer Personal Data, the data protection obligations set out in Article 28(3) of the GDPR, as described in these Terms, are imposed on the Subprocessor; and

(b) remain fully liable for all obligations subcontracted to, and all acts and omissions of, the Subprocessor.
11.4 **Opportunity to Object to Subprocessor Changes.**

(a) When any new Third Party Subprocessor is engaged during the Term, Google will, at least 30 days before the new Third Party Subprocessor processes any Customer Data, inform Customer of the engagement (including the name and location of the relevant subprocessor and the activities it will perform) either by sending an email to the Notification Email Address or via the Admin Console.

(b) Customer may object to any new Third Party Subprocessor by terminating the Agreement immediately upon written notice to Google, on condition that Customer provides such notice within 90 days of being informed of the engagement of the subprocessor as described in Section 11.4(a). This termination right is Customer’s sole and exclusive remedy if Customer objects to any new Third Party Subprocessor.

12. **Cloud Data Protection Team; Processing Records.**

12.1 **Google's Cloud Data Protection Team.** If you have an Edge Cloud Support package, please create a support ticket via the [Edge Support Portal](https://support.google.com/cloud/contact/dpo) to contact Google’s Cloud Data Protection Team. If not or alternatively, Google’s Cloud Data Protection Team can be contacted by filling out the form located at [https://support.google.com/cloud/contact/dpo](https://support.google.com/cloud/contact/dpo)(and/or via such other means as Google may provide from time to time).

12.2 **Google’s Processing Records.** Customer acknowledges that Google is required under the GDPR to: (a) collect and maintain records of certain information, including the name and contact details of each processor and/or controller on behalf of which Google is acting and, where applicable, of such processor’s or controller’s local representative and data protection officer; and (b) make such information available to the supervisory authorities. Accordingly, if the GDPR applies to the processing of Customer Personal Data, Customer will, where requested, provide such information to Google via the Admin Console or other means provided by Google, and will use the Admin Console or such other means to ensure that all information provided is kept accurate and up-to-date.

13. **Liability**

13.1 **Liability Cap.** If Model Contract Clauses have been entered into as described in Section 10.2 (Transfers of Data Out of the EEA), the total combined liability of either party and its Affiliates towards the other party and its Affiliates under or in connection with the Agreement and such Model Contract Clauses combined will be limited to the Agreed Liability Cap for the relevant party, subject to Section 13.2 (Liability Cap Exclusions).

13.2 **Liability Cap Exclusions.** Nothing in Section 13.1 (Liability Cap) will affect the remaining terms of the Agreement relating to liability (including any specific exclusions from any limitation of liability).

14. **Third Party Beneficiary**

Notwithstanding anything to the contrary in the Agreement, where Google LLC is not a party to the Agreement, Google LLC will be a third party beneficiary of Section 7.5 (Reviews and Audits of Compliance), Section 11.1 (Consent to Subprocessor Engagement) and Section 13 (Liability) of these Terms.
15. **Effect of These Terms**

Notwithstanding anything to the contrary in the Agreement, to the extent of any conflict or inconsistency between these Terms and the remaining terms of the Agreement, these Terms will govern.

**Appendix 1: Subject Matter and Details of the Data Processing**

**Subject Matter**
Google’s provision of the Cloud Services to Customer.

**Duration of the Processing**
The Term plus the period from the expiry of the Term until deletion of all Customer Data by Google in accordance with these Terms.

**Nature and Purpose of the Processing**
Google will process Customer Personal Data for the purposes of providing the Cloud Services to Customer in accordance with these Terms.

**Categories of Data**
Data relating to individuals provided to Google via the Cloud Services by (or at the direction of) Customer or by Customer’s end users.

**Data Subjects**
Data subjects include the individuals about whom data is provided to Google via the Cloud Services by (or at the direction of) Customer or by Customer’s end users.

**Appendix 2: Security Measures**

As from the Terms Effective Date, Google will implement and maintain the Security Measures set out in this Appendix 2. Google may update or modify such Security Measures from time to time provided that such updates and modifications do not result in the degradation of the overall security of the Cloud Services.

1. **Data Center and Network Security**

This Section 1 describes only Google owned and operated data center and network security and not those of Third Party Subprocessors or Infrastructure Providers.

(a) **Google Data Centers.**

*Infrastructure*. Google maintains geographically distributed data centers. Google stores all production data in physically secure data centers.

*Redundancy*. Infrastructure systems have been designed to eliminate single points of failure and minimize the impact of anticipated environmental risks. Dual circuits, switches, networks or other necessary devices help provide this redundancy. The Cloud Services are designed to allow Google to perform certain types of preventative and corrective maintenance without interruption. All environmental equipment and facilities have documented preventative maintenance procedures that detail the process for and frequency of performance in accordance with the manufacturer’s or internal specifications. Preventative and corrective maintenance of the data center equipment is scheduled through a standard change process according to documented procedures.
**Power.** The data center electrical power systems are designed to be redundant and maintainable without impact to continuous operations, 24 hours a day, 7 days a week. In most cases, a primary as well as an alternate power source, each with equal capacity, is provided for critical infrastructure components in the data center. Backup power is provided by various mechanisms such as uninterruptible power supplies (UPS) batteries, which supply consistently reliable power protection during utility brownouts, blackouts, over voltage, under voltage, and out-of-tolerance frequency conditions. If utility power is interrupted, backup power is designed to provide transitory power to the data center, at full capacity, for up to 10 minutes until the diesel generator systems take over. The diesel generators are capable of automatically starting up within seconds to provide enough emergency electrical power to run the data center at full capacity typically for a period of days.

**Server Operating Systems.** Google servers use a Linux based implementation customized for the application environment. Data is stored using proprietary algorithms to augment data security and redundancy. Google employs a code review process to increase the security of the code used to provide the Cloud Services and enhance the security products in production environments.

**Businesses Continuity.** Google replicates data over multiple systems to help to protect against accidental destruction or loss. Google has designed and regularly plans and tests its business continuity planning/disaster recovery programs.

(b) Google Networks and Transmission.

**Data Transmission.** Data centers are typically connected via high-speed private links to provide secure and fast data transfer between data centers. This is designed to prevent data from being read, copied, altered or removed without authorization during electronic transfer or transport or while being recorded onto data storage media. Google transfers data via Internet standard protocols.

**External Attack Surface.** Google employs multiple layers of network devices and intrusion detection to protect its external attack surface. Google considers potential attack vectors and incorporates appropriate purpose built technologies into external facing systems.

**Intrusion Detection.** Intrusion detection is intended to provide insight into ongoing attack activities and provide adequate information to respond to incidents. Google’s intrusion detection involves:

1. tightly controlling the size and make-up of Google’s attack surface through preventative measures;
2. employing intelligent detection controls at data entry points; and
3. employing technologies that automatically remedy certain dangerous situations.

**Incident Response.** Google monitors a variety of communication channels for security incidents, and Google’s security personnel will react promptly to known incidents.

**Encryption Technologies.** Google makes HTTPS encryption (also referred to as SSL or TLS connection) available. Google servers support ephemeral elliptic curve Diffie-Hellman cryptographic key exchange signed with RSA and ECDSA. These perfect forward secrecy (PFS) methods help protect traffic and minimize the impact of a compromised key, or a cryptographic breakthrough.
2. Access and Site Controls

(a) Site Controls. This Section 2(a) describes only Google owned and operated data center site controls and not those of Third Party Subprocessors or Infrastructure Providers.

On-site Data Center Security Operation. Google’s data centers maintain an on-site security operation responsible for all physical data center security functions 24 hours a day, 7 days a week. The on-site security operation personnel monitor closed circuit TV (CCTV) cameras and all alarm systems. On-site security operation personnel perform internal and external patrols of the data center regularly.

Data Center Access Procedures. Google maintains formal access procedures for allowing physical access to the data centers. The data centers are housed in facilities that require electronic card key access, with alarms that are linked to the on-site security operation. All entrants to the data center are required to identify themselves as well as show proof of identity to on-site security operations. Only authorized employees, contractors and visitors are allowed entry to the data centers. Only authorized employees and contractors are permitted to request electronic card key access to these facilities. Data center electronic card key access requests must be made through e-mail, and require the approval of the requestor’s manager and the data center director. All other entrants requiring temporary data center access must: (i) obtain approval in advance from the data center managers for the specific data center and internal areas they wish to visit; (ii) sign in at on-site security operations; and (iii) reference an approved data center access record identifying the individual as approved.

On-site Data Center Security Devices. Google’s data centers employ an electronic card key and biometric access control system that is linked to a system alarm. The access control system monitors and records each individual’s electronic card key and when they access perimeter doors, shipping and receiving, and other critical areas. Unauthorized activity and failed access attempts are logged by the access control system and investigated, as appropriate. Authorized access throughout the business operations and data centers is restricted based on zones and the individual’s job responsibilities. The fire doors at the data centers are alarmed. CCTV cameras are in operation both inside and outside the data centers. The positioning of the cameras has been designed to cover strategic areas including, among others, the perimeter, doors to the data center building, and shipping/receiving. On-site security operations personnel manage the CCTV monitoring, recording and control equipment. Secure cables throughout the data centers connect the CCTV equipment. Cameras record on site via digital video recorders 24 hours a day, 7 days a week. The surveillance records are retained for up to 30 days based on activity.

(b) Access Control.

Infrastructure Security Personnel. Google has, and maintains, a security policy for its personnel, and requires security training as part of the training package for its personnel. Google’s infrastructure security personnel are responsible for the ongoing monitoring of Google’s security infrastructure, the review of the Cloud Services, and responding to security incidents.

Access Control and Privilege Management. Customer’s administrators must authenticate themselves via a central authentication system or via a single sign on system in order to administer the Cloud Services.

Internal Data Access Processes and Policies – Access Policy. Google’s internal data access processes and policies are designed to prevent unauthorized persons and/or systems from gaining access to systems used to process personal data. Google designs its systems to (i) only allow authorized persons to access data they are authorized to access;
and (ii) ensure that personal data cannot be read, copied, altered or removed without
authorization during processing, use and after recording. Google employs a centralized
access management system to control personnel access to production servers, and only
provides access to a limited number of authorized personnel. LDAP, Kerberos and a
proprietary system utilizing SSH certificates are designed to provide Google with secure
and flexible access mechanisms. These mechanisms are designed to grant only approved
access rights to site hosts, logs, data and configuration information. Google requires the
use of unique user IDs, strong passwords, two factor authentication and carefully monitored
access lists to minimize the potential for unauthorized account use. The granting or
modification of access rights is based on: the authorized personnel’s job responsibilities; job
duty requirements necessary to perform authorized tasks; and a need to know basis. The
granting or modification of access rights must also be in accordance with Google’s internal
data access policies and training. Where passwords are employed for authentication (e.g.,
login to workstations), password policies that follow at least industry standard practices are
implemented. These standards include password expiry, restrictions on password reuse
and sufficient password strength. For access to extremely sensitive information (e.g. credit
card data), Google uses hardware tokens.

3. Data

(a) Data Storage, Isolation and Logging. Google stores data in a multi-tenant environment.
The data and file system architecture are replicated between multiple geographically
dispersed Google owned or operated data centers. Google also logically isolates the
Customer’s data. Customer will be given control over specific data sharing policies. Those
policies, in accordance with the functionality of the Cloud Services, will enable Customer to
determine the product sharing settings applicable to Customer users for specific purposes.
Customer may choose to make use of certain logging capability that Google may make
available via the Services.

(b) Decommissioned Disks and Disk Erase Policy in Google Data Centers. Certain disks
containing data may experience performance issues, errors or hardware failure that lead
them to be decommissioned (“Decommissioned Disk”). Every Decommissioned Disk is
subject to a series of data destruction processes (the “Disk Erase Policy”) before leaving
Google’s premises either for reuse or destruction. Decommissioned Disks are erased in a
multi-step process and verified complete by at least two independent validators. The erase
results are logged by the Decommissioned Disk’s serial number for tracking. Finally, the
erased Decommissioned Disk is released to inventory for reuse and redeployment. If, due
to hardware failure, the Decommissioned Disk cannot be erased, it is securely stored until it
can be destroyed. Each facility is audited regularly to monitor compliance with the Disk
Erase Policy.

4. Personnel Security

Google personnel are required to conduct themselves in a manner consistent with the
company’s guidelines regarding confidentiality, business ethics, appropriate usage, and
professional standards. Google conducts reasonably appropriate backgrounds checks to
the extent legally permissible and in accordance with applicable local labor law and
statutory regulations.

Personnel are required to execute a confidentiality agreement and must acknowledge
receipt of, and compliance with, Google’s confidentiality and privacy policies. Personnel are
provided with security training. Personnel handling Customer Data are required to complete
additional requirements appropriate to their role (e.g., certifications). Google’s personnel will
not process Customer Data without authorization.
5. Subprocessor Security

Before onboarding Subprocessors, Google conducts an audit of the security and privacy practices of Subprocessors to ensure Subprocessors provide a level of security and privacy appropriate to their access to data and the scope of the services they are engaged to provide. Once Google has assessed the risks presented by the Subprocessor, then subject to the requirements set out in Section 11.3 (Requirements for Subprocessor Engagement) of these Terms, the Subprocessor is required to enter into appropriate security, confidentiality and privacy contract terms.
