

# We're in this together.

## Driving Chrome Browser Success in Your Enterprise.

Chrome Browser empowers employees with the flexibility to access data and apps on the web, on any device, while ensuring enterprises stay safe and mitigate risks. But as enterprise environments grow more complex, IT can often benefit from expert guidance and support for their browsers.

Partnering with specialists can ensure a fast deployment with seamless and secure browser management.

Chrome Browser's team of customer success managers, deployment specialists and partner community can help your enterprise get started with Chrome Browser.

Our support team can ensure you have access to the resources you need and answer your questions around the clock, so you can offer your users a reliable and secure browsing experience.

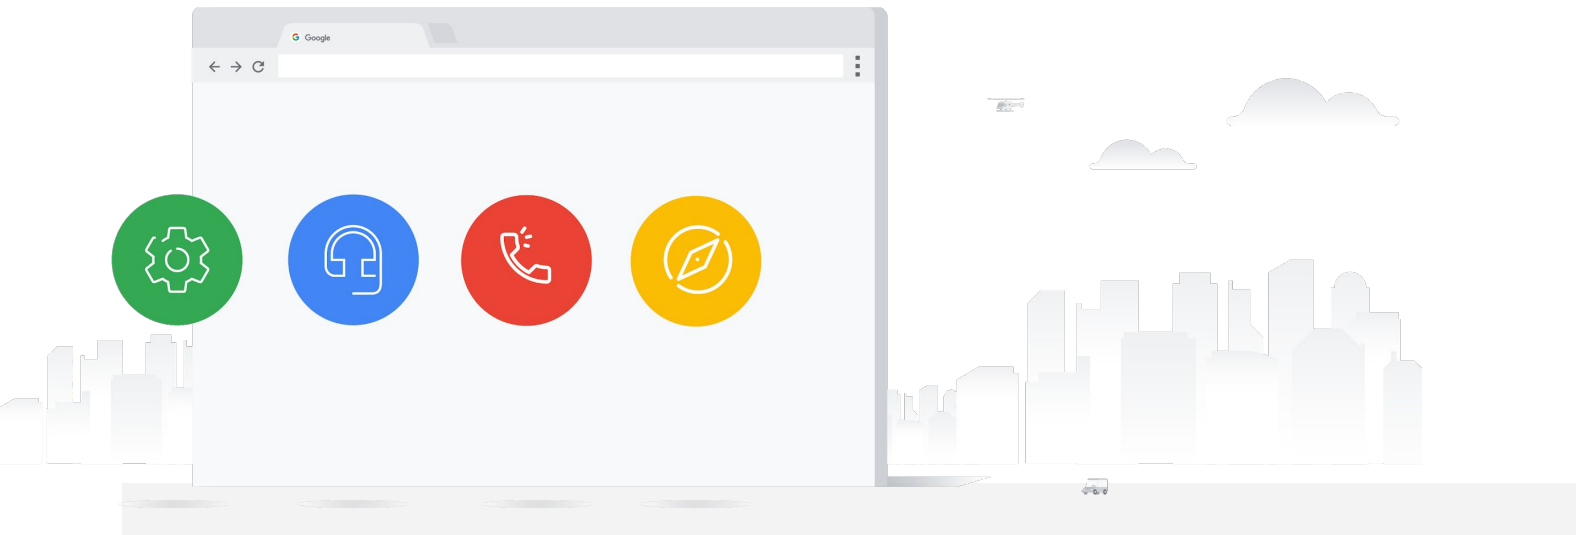

## Getting Started with Chrome Browser

It's easy to download the Chrome Browser enterprise bundle. You'll have instant access to more than 300 policies that allow you to configure your Chrome Browser instances across your organization. You can customize Chrome Browser according to your organization's unique security, user and stability requirements. Your team can begin managing Chrome Browser centrally, either through our Google Admin management portal or through Group Policy.

Many enterprises with complex environments want the added assurance that they are following best practices and offering users a smooth transition from legacy browsers to Chrome. Google's deployment and service teams, as well as our partner community can help. With a variety of deployment programs, you can work with an expert to scope and implement Chrome Browser seamlessly across your organization.

## Enterprise Support for Chrome Browser

Some organizations also want the ability to access support and Chrome experts beyond deployment. Enterprise support is available to Chrome Browser customers, offering IT 24/7 unlimited phone, email and online support.

You'll get the expert help you need to manage Chrome Browser in your environment, regardless if your team is operating on Windows, Mac or Linux.

With Chrome Browser enterprise support, you'll always have support for the latest stable, beta and dev versions of Chrome Browser across Windows, Mac and Linux. You can get unlimited help related to:

-  Windows Group Policy templates
-  MSI installer for the Chrome Browser
-  Legacy browser support extension for Chrome Browser
-  Browser issues not caused by third-party software or websites
-  Best practices for deployment, management and updating

## Custom Support and Service Offerings

Enterprises may have unique needs related to widespread adoption of Chrome Browser. For example, needs around application modernization and testing can slow down projects. Google has in-house and partner resources that can help you on this journey. You can also arrange for a point of contact on the Google Chrome Enterprise team to support your enterprise long term. Have other specific needs? Our team can work with you to help you successfully manage Chrome Browser in your organization.

To get started, contact us at [chrome.com/enterprise](https://chrome.com/enterprise).
