

**Google Workspace Mapping** 

This document is designed to help firms supervised by the Financial Industry Regulatory Authority ("regulated entity") to consider Regulatory Notice 21-29 Vendor Management and Outsourcing ("framework") in the context of Google Workspace and the Google Cloud Financial Services Contract.

We focus on the following requirements of the framework: Due Diligence, Vendor Onboarding, Supervision. For each paragraph, we provide commentary to help you understand how you can address the requirements using the Google Cloud services and the Google Cloud Financial Services Contract.

#	Framework reference	Google Cloud commentary	Google Cloud Financial Services Contract reference
1.	II. Due Diligence		
2.	Once a member firm decides to outsource an activity or function, it may want to consider some or all of the following questions in evaluating and selecting potential Vendors:		N/A
3.	Due Diligence Approach		
4.	Risk Management) relevant to, and with the requisite experience to assess, the	Our <u>Risk Governance of Digital Transformation in the Cloud</u> whitepaper can help you understand what a cloud transformation means for risk, compliance, and audit functions, and how to best position those programs for success in the cloud world.	N/A
5.	<ul> <li>What factors does your firm consider when conducting due diligence on potential Vendors? These may include, but are not limited to: a Vendors' financial condition, experience and reputation; familiarity with regulatory requirements, fee structure and incentives; the background of Vendors' principals, risk management programs, information security controls, and resilience.</li> </ul>	• You can review Google's corporate and financial information on <u>Alphabet's</u> <u>Investor Relations</u> page. This provides information about our mission, business	N/A

		Google provides detailed information to customers about our security practices so that customers can understand them and consider them as part of their own risk analysis.	
		More information is available at:	
		<ul> <li>Our <u>infrastructure security</u> page</li> <li>Our <u>security whitepaper</u></li> <li>Our <u>cloud-native security whitepaper</u></li> <li>Our <u>infrastructure security design overview</u> page</li> <li>Our <u>security resources</u> page</li> </ul>	
		In addition, you can review Google's <u>SOC 2 report</u> .	
		(2) Security of your data and applications in the cloud	
		You define the security of your data and applications in the cloud. This refers to the security measures that you choose to implement and operate when you use the Services.	
		(a) <u>Security by default</u>	
		Although we want to offer you as much choice as possible when it comes to your data, the security of your data is of paramount importance to Google and we take the following proactive steps to assist you:	
		• Encryption at rest. Google encrypts certain data while it is stored at rest on a disk (including solid-state drives) or backup media. Even if an attacker or someone with physical access obtains the storage equipment containing your data, they won't be able to read it because they don't have the necessary encryption keys.	
		• Encryption in transit. Google encrypts all data while it is "in transit"traveling over the Internet and across the Google network between data centers. Should an attacker intercept such transmissions, they will only be able to capture encrypted data, at one or more network layers when data moves outside physical boundaries not controlled by Google or on behalf of Google.	
		(b) <u>Security products</u>	
		In addition to the other tools and practices available to you outside Google, you can choose to use tools provided by Google to enhance and monitor the security of your

		data. Information on Google's security products is available on our <u>Cloud Security</u> <u>Products</u> page.	
		(c) <u>Security resources</u>	
		Google also publishes guidance on:	
		<ul> <li>Security best practices</li> <li>Security use cases</li> </ul>	
20.	III. Vendor Onboarding		
21.	After completing due diligence and selecting a Vendor, firms may wish to consider putting in place a written contract with the Vendor that addresses, among other things, both the firm's and the Vendor's roles with respect to outsourced regulatory obligations.		N/A
22.	Vendor Contracts		
23.	<ul> <li>Does your firm document relationships with Vendors in a written contract, and if not, under what circumstances?</li> </ul>	The use of the Services is governed by the Google Cloud Financial Services Contract.	N/A
24.	<ul> <li>Do your firm's contracts address, when applicable, Vendors' obligations with respect to such issues as:</li> </ul>		
25.		Customers can review Google's current certifications, including related evidences or reports, at any time. https://cloud.google.com/security/compliance/offerings/#/	N/A
26.	<ul> <li>non-disclosure and confidentiality of information;</li> </ul>	Google makes robust confidentiality commitments in our contract. In particular, we commit to only use confidential information that you share with us in accordance with our contract and to protect that information from disclosure.	Confidentiality
27.	<ul> <li>protection of non-public, confidential and sensitive firm and customer information;</li> </ul>	Refer to Row 19.	N/A

Google Workspace Mapping

#	Framework reference	Google Cloud commentary	Go ref
28.	<ul> <li>ownership and disposition of firm and customer data at the end of the Vendor relationship;</li> </ul>	You retain all intellectual property rights in your data, the data you derive from your data using our services and your applications, both during the term and after termination. On termination of the contractual relationship, Google will comply with the regulated	Inte
		entity's instruction to delete Customer Data from Google's systems.	Sec
29.		Google will make information about developments that materially impact Google's ability to perform the Services in accordance with the SLAs available to you. More information is available at our <u>Google Workspace Status</u> page.	Sigr
		In addition, Google will notify you of data incidents promptly and without undue delay. More information on Google's data incident response process is available in our <u>Data</u> <u>incident response whitepaper</u> .	Dat <u>Adc</u>
30.	<ul> <li>Vendor BCP practices and participation in your firm's BCP testing, including frequency and availability of test results;</li> </ul>	Google will implement a business continuity plan for the Services, review and test it at least annually and ensure it remains current with industry standards. Regulated entities can review our plan and testing results.	
		More information on the reliability of the Services is available on our <u>Google Cloud Help</u> page.	
31.	<ul> <li>disclosure of relevant pending or ongoing litigation;</li> </ul>	Information about material pending legal proceedings is available in our annual reports on <u>Alphabet's Investor Relations</u> page.	N/A
32.	<ul> <li>relationships between Vendors, sub-contractors and other third-parties;</li> </ul>	Google recognizes that regulated entities need to consider the risks associated with subcontracting. To enable regulated entities to retain oversight of any subcontracting and provide choices about the services regulated entities use, Google will:	Goo
		<ul> <li>provide information about our subcontractors;</li> <li>provide advance notice of changes to our subcontractors; and</li> <li>give regulated entities the ability to terminate if they have concerns about a new subcontractor.</li> </ul>	
33.	<ul> <li>firm and regulator access to books and records; and</li> </ul>	Google recognizes that regulated entities and their supervisory authorities must be able to audit our services effectively. Google grants information, audit and access rights to regulated entities, supervisory authorities, and both their appointees.	Reg Cus
