Start optimization loop

Assessing your current environment, teams, and optimization loop

Assess your environment

Assess your teams

Assess your optimization loop

Establishing your optimization requirements and goals

Define your optimization requirements

Can you set measurable goals?

Set measurable goals

Optimizing your environment and training your teams

Measure your environment, teams, and optimization loop

Analyze data

Did you achieve all the goals?

Did you achieve all the goals?

Optimize your team and environment

Are the goals achievable?
